TIMELINE AND MILESTONES

PHASE	TASK	DURATION
WEEK 1	Planning and research	5 days
WEEK 2	Designing e.g. Wireframes	5 days
WEEK 3	Development	7 days
WEEK 4	Testing	3 days
WEEK 5	Final Review	2 days

The company determines its target market, product categories, and website requirements during the project's planning phase. The design process comes next, when a crucial milestone is the creation and approval of the layout, colour scheme, and product display structure. Another milestone is a fully operational online store, which is achieved during the construction phase when the website is constructed with necessary features including product pages, a shopping cart, and a checkout system. After then, testing makes sure that every feature functions properly and error-free, particularly the

ordering and payment systems. The final milestone of the project is the completion of the website and its preparedness for consumer use, which is marked by a review and launch preparation phase.

BUDGET

ITEM	ESTIMATED COST (ZAR)
Domain name (per year)	R150
Hosting (per year)	R1,200
Website development	R4,000
Maintenance	R800
Total estimated cost	R6,150

The expected expenses needed to create and maintain the company website are listed in the *Packaged To A Tee!!!* budget. The website's unique online address is provided by the domain name, which costs about R150 annually. The website's internet accessibility is ensured by hosting, which costs about R1,200 annually. The design and construction of the website, including crucial e-commerce elements like product pages, a shopping cart, and a checkout system, are covered under the estimated R4,000 website development cost. Updates, product modifications, and technical assistance are also covered by an annual maintenance fee of about R800. Overall, the budget supports the company's objective of selling hampers online while guaranteeing that the website is sustainable, practical, and reasonably priced.
